

BABIL

Human-in-the-Loop AI Options Trading Agent

ALPACA PAPER • RISK GATES • FAIL-CLOSED EXECUTION

DON'T JUST AUTOMATE THE TRADE.

BUILD THE FORTRESS AROUND IT.

AI can reason. Execution must be governed.

BABIL separates intelligence from execution authority.

THE RISK

An LLM should not directly control

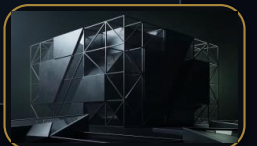

price • strike • quantity • premium • order
ID

**The model proposes.
The fortress validates.
The human authorizes.**

THE DESIGN PRINCIPLE

**Execution is a privileged
capability.**

Deterministic gates, explicit approval,
fail-closed behavior, and a kill switch
stand between AI reasoning and the
broker.

From AI proposal to bounded execution

CONTROLLED CHAIN

01 AI Proposal

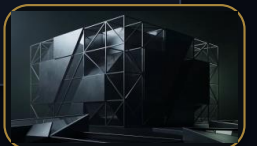

02 READ-ONLY Market Context

03 Proposal Bridge

04 G0–G5 Risk Gates

05 Authorization + Human Approval

06 Paper Execution

G0–G5: every gate must pass

A single failure stops the chain.

G0 Market

session / clock validity

G1 Contract

contract validity

G2 Liquidity

spread / liquidity

G3 Exposure

$\leq 2\%$ of equity

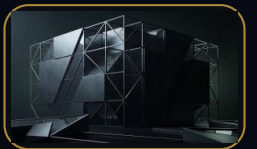

G4 Options Level

account capability

G5 Economics

risk / reward threshold

FAIL-CLOSED → no valid proposal = no execution

Dynamic Proposal Discovery

The dashboard displays the following information:

- Market Data:**
 - Bitcoin Price: \$399.05
 - Buyer Power: \$385.07
 - Position: 1 / 1 (100% Protected)
 - Last Scan: 22:45 JST (15% Used)
- Navigation:** 1. 司令部 (Command) | 2. 艦隊管理 (Trading) | 3. 信号と探索 (Signals) | 4. 活動と監査 (Activity) | 5. システム (System)
- Alerts:**
 - ロブロス 広域探索レーダー & AI判定ステータス
 - 【一次情報透明性表示】: 現在 multi_ai_decision.py はテスト用モックコードで稼働中です。
- Diagnosis Section:**
 - 任意銘柄リアルタイム診断
 - 診断したいティッカーを入力
 - AIUR
 - 診断実行
- Scoreboard:**
 - 主要監視銘柄のモック判定スコア

銘柄	スコア	株価
0 TQQQ	70pt (高評価)	\$68.04
1 NWA	70pt (高評価)	\$306.72
2 AIUR	40pt (待機)	\$100.0 (モック初期値)
3 CRDO	40pt (待機)	\$100.0 (モック初期値)

conditions and evaluates trading

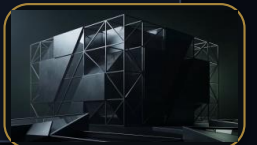

WHAT HAPPENED

Real quotes changed the answer.

BABIL re-evaluated eligible candidates through the existing G0–G5 gates.

G5 rejected the available candidates.

VALID_PROPOSAL_NOT_FOUND

The AI does not get the keys.

Make AI trading governable.

AI remains useful without receiving unrestricted execution authority.

Deterministic • Testable • Auditable • Fail-Closed • Human-Authorized

BABIL is not about making AI trade faster.
It is about building the fortress around the trade.

BABIL

DON'T JUST AUTOMATE THE TRADE.

BUILD THE FORTRESS AROUND IT.

BABIL • Alpaca Paper • Human-in-the-Loop
